

Groundbreaking Grants! Innovation 2016-2017

Where, exactly, does one's liver sit in relation to one's stomach and heart, and would your understanding of anatomy be enhanced if you learned by building human systems from clay? How do videographers use drones in filmmaking? Can the physical design of a classroom support brain research to maximize learning for young children? How does a garden grow into an outdoor classroom and community-centered space for intra-district projects which support science, culinary arts, social studies--and also fight hunger?

The many fabulous grant proposals submitted to WEEF this year demonstrate the innovative approaches our WPS staff and faculty are bringing to classroom instruction. WEEF is proud to support programming which utilizes best practices to bring important content to students throughout the district--and which will address the questions above, and more! To find out more about the projects WEEF is supporting this year, visit www.weefri.org. From robotics to marching band to projects in social action, innovations abound!

55 Teachers Recognized Through Teacher Appreciation Program!

Thank you to the Westerly Sun, Westerly Public Schools and all of the nominating families who made 2016 the most successful Teacher Appreciation event to date! WEEF raised over \$1,200 which will go back into the schools to fund more innovative programs designed by our talented teachers.

This year, WEEF introduced a new component to the program and every nominated teacher was entered into a drawing to win a \$1k WEEF Grant. Congratulations to our winner, Mike Nenna, of Westerly Middle School!

To see a complete list of all the nominated teachers, visit our website at www.weefri.org.
